

**AGENDA ITEM #11: HAMPTON ROADS COMMUTING PATTERNS**  
***Keith Nichols, HRTPO***

As part of the American Community Survey, the U.S. Census Bureau collects data on where people live and where people work. Based on this effort, the Census Bureau prepares county-to-county commuting flow data, which shows the number of workers that commute from one locality to another.

HRTPO staff has analyzed the county-to-county commuting flow data for Hampton Roads jurisdictions for the years 2009-2013. In addition, HRTPO staff, in conjunction with Hampton Roads Planning District Commission staff, has prepared maps showing the commuting patterns for each locality. These maps are available on the HRTPO website at <http://www.hrtpo.org/page/hampton-roads-journey-to-work-maps>.

**Mr. Keith Nichols, Principal Transportation Engineer, will brief the TTAC on this item.**

**RECOMMENDED ACTION:**

For discussion and informational purposes.
