

AGENDA ITEM #12: LESNER BRIDGE CONSTRUCTION UPDATE
Chris Wojtowicz, Virginia Beach

The Lesner Bridge project is for the replacement of the existing deteriorating bridge over the Lynnhaven Inlet, with a new signature bridge consisting of twin spans, constructed with pre-fabricated concrete segmental box sections. The project is a 2011 Governor's Transportation Plan project and is the single largest transportation project ever administered by the City. Construction is approximately 50% complete and scheduled for 100% completion in August 2017.

Mr. Chris Wojtowicz, the City's Project Manager, will brief the TTAC on this project.
