

AGENDA ITEM #10: TRAFFIX ANNUAL REPORT: HRT

The TRAFFIX service of Hampton Roads Transit (HRT) is a travel demand management program currently funded with Congestion Mitigation and Air Quality (CMAQ) Improvement Program and Regional Surface Transportation Program (RSTP) funds. Performance is monitored by the TRAFFIX Oversight Subcommittee (TOS), which has direct oversight over all aspects of the Hampton Roads TDM function and maintains direct oversight of the status of TRAFFIX programs and how allocated funding is spent.

TRAFFIX has produced an annual report that defines and tabulates a comprehensive set of performance measures including actions, outcomes, and budget. Within the document, a baseline of performance data is compiled from FY 2007 through FY 2014.

Mr. Ron Hodges, TRAFFIX Director, will brief the TTAC on the FY 2014 Annual Report.

RECOMMENDED ACTION:

For discussion and informational purposes.
