

ITEM #14: HAMPTON ROADS GATEWAY ANALYSIS
Robert Case and Keith Nichols, HRTPO

Improvements have been proposed for many of the corridors that provide access to and from Hampton Roads, including widening I-64 between Richmond and Williamsburg, replacing all or portions of Routes 58 and 460 with limited access facilities, and building I-87 to and from North Carolina. HRTPO staff has been comparing the proposed improvements on these corridors based on the overall collective impact on the Hampton Roads region.

The presentation will include an update on the analyses conducted thus far including evaluation of traffic volumes, safety, and congestion, and estimation of costs and benefits of proposed projects on select gateway highways.

Dr. Robert Case, HRTPO Chief Transportation Engineer, and Mr. Keith Nichols, HRTPO Principal Transportation Engineer, will brief the HRTPO Board on this item.
