

AGENDA ITEM #15: TRANSIT PROVISIONS OF THE FAST ACT
Rob Jaques, HRTPO

On December 4, 2015, the Fixing America's Surface Transportation (FAST) Act was signed into law. The FAST Act made changes to existing provisions of Federal Law pertaining to transit infrastructure investment, including reforms to improve and consolidate public transportation programs, increase flexibility for states and local governments to meet their transit needs, and address transit safety. The FAST Act also provides stable 5-year funding with a slight increase over previous funding levels, including \$60 billion for public transportation over the life of the bill.

Mr. Rob Jaques, Transportation Planner, will brief the TTAC on this item.
