

**AGENDA ITEM #13: 2040 LONG-RANGE TRANSPORTATION PLAN – TRANSPORTATION CHALLENGES AND STRATEGIES: DRAFT**

The 2040 Hampton Roads Long-Range Transportation Plan (LRTP) – on schedule for HRTPO Board adoption this summer – is being produced as a compendium of reports. To date, reports have been released on the Visioning Survey, 2040 Socioeconomic Forecast and TAZ Allocation, Committed and Candidate Transportation Projects, and Prioritization of Transportation Projects – Project Evaluation and Scoring. Additional reports will be produced related to Title VI/Environmental Justice, the fiscally-constrained list of LRTP projects, public involvement, and plan performance.

The draft report, which will be available for review soon after the TTAC meeting, details the current and future challenges associated with transportation in Hampton Roads. Chapters in the report emphasize mobility and accessibility challenges; system preservation, safety, and security; environmental concerns; and financial issues. A number of strategies are highlighted that will help confront these challenges.

Mr. Keith Nichols, Principal Transportation Engineer, will brief the TTAC on this item.

**RECOMMENDED ACTION:**

Review draft report and submit comments to Keith Nichols ([knichols@hrtpo.org](mailto:knichols@hrtpo.org)) by COB Friday, May 22, 2015.
