

AGENDA ITEM #8: 2045 LRTP CANDIDATE PROJECTS: DATA COLLECTION STATUS UPDATE

HRTPO staff initiated the process of collecting and producing data for the Project Prioritization Tool, this includes running the regional travel demand model and conducting spatial overlay analysis.

In addition to the above, a data collection spreadsheet was emailed to LRTP Subcommittee members on June 5, 2020 requesting essential project data needed to properly evaluate the candidate projects. Feedback was requested by June 26, 2020. **Note: staff will not be able to properly evaluate candidate projects without this input from stakeholders.**

Ms. Theresa Brooks, Transportation Engineer III, will brief the LRTP Subcommittee on this agenda item.

RECOMMENDED ACTION:

For discussion.
