

AGENDA ITEM #9: HAMPTON ROADS CONGESTION MANAGEMENT PROCESS: PUBLIC INVOLVEMENT ACTIVITIES

At the September 3, 2014 Technical Transportation Advisory Committee (TTAC) meeting, Mr. Keith Nichols, Senior Transportation Engineer, delivered an update on the 2014 *Hampton Roads Congestion Management Process*, including the following set of public involvement goals for the process:

- Ensure that the public's perspective and observations are included in the CMP.
- Promote a greater awareness of the Congestion Management Process and how the public can weigh in on the CMP Report.
- Provide a convenient, engaging platform for public engagement and feedback.

HRTPO staff conducted a comprehensive public involvement and outreach effort from September 3, 2014 to September 19, 2014 to achieve these goals, including a series of 14 individual surveys for those CMP corridors identified within the report as among the most congested in the region. A total of 1,156 responses were received.

Ms. Kendall Miller, Administrator of Public Involvement and Title VI, will brief the TTAC on this item.
