

## **F. 2045 Long-Range Transportation Plan (LRTP): Transportation Challenges and Strategies Report: Final**

The 2045 Hampton Roads Long-Range Transportation Plan (LRTP), on schedule for HRTPO Board adoption next year, is being produced as a compendium of reports. To date, reports have been released on the 2045 Socioeconomic Forecast and TAZ Allocation, Regional Needs, and the Title VI/Environmental Justice Candidate Projects Evaluation. Additional reports will be produced related to Project Prioritization, the Funding Plan (including a fiscally-constrained list of LRTP projects), Plan Performance, a Project Information Guide, documentation of Public Involvement efforts, and Rural Transportation.

This report details current and anticipated challenges associated with transportation in Hampton Roads. Chapters in the report focus on challenges related to mobility and accessibility, system preservation, the environment, and financial issues. A number of strategies are highlighted that will help address these challenges.

This report was made available for public review and comment from September 2, 2020 through September 16, 2020. Comments received were incorporated into the final report. The Transportation Technical Advisory Committee (TTAC) has recommended approval of the final report.

The final report is available at:
