

**ITEM #10: I-64 REGIONAL EXPRESS LANES UPDATE**  
***VDOT and HRTPO Staff***

During the Concurrent HRTAC & HRTPO Board meeting in September, the Boards received briefings on the 2040 managed lanes analysis conducted by HRTPO staff and the 2025 analysis conducted by VDOT staff. Following the VDOT presentation, Commissioner Brich noted some issues related to the proposed managed lanes network, including:

- Tolling Policy
  - HOT2 or HOT3
  - Hours of Operation
  
- Financing of Proposed Managed Lanes Scenario
  - Traffic & Revenue
  - Costs of Additional Proposed Improvements
  - Cost of Incorporating Part-time HOT Shoulder Lane in High Rise Bridge Project

Commissioner Brich stated he expected to have the cost information for the additional improvements mentioned in the VDOT presentation, as well as information from the traffic and revenue study, ready to present to the Boards at the October meeting.

Following the September meeting, HRTPO Chair Shepperd formed an Express Lanes Working Committee

VDOT and HRTPO staff will brief the HRTAC & HRTPO Boards on this item.

**RECOMMENDED ACTION:**

Provide feedback to VDOT and HRTPO staff on any additional analysis that would be helpful to the Boards in reaching a regional decision on an express lanes network.
