

AGENDA ITEM #13: IDENTIFYING CANDIDATE STREETS FOR CONVERSION FROM ONE-WAY TO TWO-WAY OPERATION
Robert Case, HRTPO

The improvement in crashes, crime, and property values reported in other metro areas following the conversion of certain one-way streets to two-way operation led HRTPO staff to propose a study of such conversions for Hampton Roads.

Dr. Robert Case, HRTPO Principal Transportation Engineer, will brief the TTAC on this item and make a request for volunteers to assist in steering the analysis.
