

AGENDA ITEM #5: HAMPTON BOULEVARD CORRIDOR STUDY: DRAFT
Robert Case and Keith Nichols, HRTPO

Over recent decades, the citizens and government of Norfolk have been concerned about the interaction of modes—truck, pedestrian, auto, rail—on the heavily used Hampton Boulevard corridor, which serves the World’s largest naval base, a major Port of Virginia terminal, a major university, a regional medical center, and multiple neighborhoods. In response to a request from the City of Norfolk, HRTPO staff has analyzed the study corridor and provided options for reducing the number of trucks, improving safety, mitigating trains blocking roads, and reducing flooding.

The *Hampton Boulevard Corridor Study: Draft* will be made available for public review and comment after the TTAC meeting on November 4, 2020.

Dr. Robert Case, HRTPO Chief Transportation Engineer, and Mr. Keith Nichols, HRTPO Principal Transportation Engineer, will brief the TTAC on this item.

RECOMMENDED ACTION:

Review the draft report and submit comments to Rob Case (rcase@hrtpo.org) by COB Wednesday, November 18, 2020.
